Evry, le 18 février 2019

Professor from Telecom SudParis is named 2019 IEEE Fellow

Daqing Zhang, researcher from Telecom SudParis is honored by the Institute of Electrical and Electronics Engineers.

The Institute of Electrical and Electronics Engineers (IEEE), a professional non-profit organization of more than 423 000 members around the world, publishes each year a list of its fellow members. These members have an “extraordinary accomplishments” in the advancement of technology and, after a rigorous evaluation procedure, one out of thousand members is getting named IEEE Fellows for his or her contributions. From January 2019, one of them will be Telecom SudParis affiliated.

Daqing Zhang, professor in Department Networks and Mobile Multimedia services at Telecom SudParis and CNRS since 2007, was honored for his “**contributions to context-aware mobile and pervasive systems**”. He is the director of the Ambient Intelligence and Pervasive System Group. He has published over 200 papers in referred journals, conferences and books, where his work on context model and middleware is widely accepted by pervasive computing, mobile computing, networking and service-oriented computing communities. His research work got around 13,000 citations with H-index of 55 (according to Google Scholar as of Nov. 2018). He is the winner of the Ten Years CoMoRea Impact Paper Award at IEEE PerCom 2013, the Honorable Mention Award at ACM UbiComp 2015 and 2016, the Best Paper Award at IEEE UIC 2015 and 2012 and the Best Paper Runner Up Award at Mobiquitous 2017 and 2011. Daqing Zhang got his Ph.D. from University of Rome "La Sapienza" and University of L'Aquila, Italy in 1996.

A propos de Télécom SudParis – www.telecom-sudparis.eu

Telecom SudParis is a leading public graduate school of engineering known for its excellent level in the field of digital sciences and technology. The quality of its programs is based on the scientific excellence of its faculty members and teaching methods focused on project management, innovation and inter-cultural knowledge. Telecom SudParis is part of Institut Mines-Télécom, France's leading group of engineering schools, supervised by the Ministry of Industry. It shares its international campus with Institut Mines-Télécom Business School. The 100 full time professors of Telecom SudParis contribute to the education of 1,000 students including 700 engineer and Master students and 180 doctoral students.
